If your car has these systems, talk to your repair technician about getting an asTech® scan today.

Important questions you should ask about Diagnostic Services

? Does the diagnostic service at this shop have access to your vehicle's original build data?

asTech® uses ONLY Original Equipment Manufacturer (OEM) factory scan tools. Only OEM tools have access to your original vehicle build data and are designed to work with your specific vehicle.

? How can you be sure the diagnostic service and software download came from a properly licensed, up-to-date and paid for OEM subscription?

asTech® uses ONLY up-to-date OEM tools and includes the actual factory scan tool name on every report.

? How can you be assured your repair facility is using a licensed OEM version to reflash and reprogram a vehicle?

asTech® uses ONLY the latest OEM tools and will gladly provide proof of a valid OEM license upon request.

? How often are the OEM updates performed on the device? And is it true that aftermarket scan devices are usually updated only twice a year?

asTech® updates its OEM factory scan tools daily! And, yes it is true, the best aftermarket device providers in the world only update their tools twice a year. Many others only do it once a year.

? Is any OEM software downloaded while the device is connected to the vehicle?

Yes. asTech® downloads updates in real-time, ensuring you receive the latest updates.

? Does the device automatically provide information on OEM vehicle recall notices and technical service bulletins?

asTech® has access to recall notices and TSB's because it uses ONLY OEM factory scan tools.

? Is the technician scanning my vehicle qualified to do so?

asTech® Technicians are ASE Certified and in many cases trained by the factory.

? Is there any warranty or guarantee if there is an issue?

asTech® guarantees that vehicles receiving a completion scan will be DTC (diagnostic trouble code) free for 3 business days or up to 250 miles, whichever comes first, following each repair. In the event a vehicle experiences an issue, asTech® will pay up to 3 days' rental expense and \$50 towards the cost of towing the vehicle back to the repair facility.
