Advanced programming capabilities that decrease cycle time and boost repair quality.

ADAS Insights

adasThink™ delivers consistent and up to date ADAS information and generates insights from all major OEM brands that explains the data and identifies calibrations needed to repair any vehicle confidently and safely.

John Bean Tru-Point

Seamless connectivity made possible – the industry's best known, John Bean Tru-Point pairs perfectly with asTech through an integrated calibration system and instantly increasing the quality of vehicle repairs.

asTech matches solutions to your shop's specific needs. The best part? Our calibrations are backed by the industry's best warranty.

Dynamic Calibrations

No space, no problem. With asTech, our remote certified technicians are a click away to walk you through the process, step-by-step – allowing you to keep calibrations in-house without the bulky shop equipment.

Static Calibrations

The asTech All-In-One device technology is your gateway to our certified remote technician experts. Advanced ADAS and programming capabilities unlocks even more opportunities to increase your bottom line and improve shop efficiency.

Start calibrating your business with a free shop assessment today!
