

# UNLOCKING HIDDEN REVENUE IN PLAIN SIGHT

Repairify's extensive technology enhancements offer increased speed, accuracy, and efficiency when completing vehicle repairs, reducing the need to connect a new tool or send a vehicle to the dealership.

**ADAS  
Insights**

**Dynamic  
Calibrations**

**asTech**  
Driven by Repairify

**Static  
Calibrations**

**Now, with the asTech® All-In-One, shop managers can keep all collision and repair services in-house, including the ability to perform successful, complete dynamic calibrations.**

#### **Full ADAS Identification**

With each unique repair, we've thought of everything upfront – from ADAS systems that are safety-critical, as well as ADAS systems included to better equip and optimize overall vehicle performance.

#### **Ramping up with the asTech All-In-One**

The All-In-One device uses adasThink™ to identify the required calibrations based on the estimate line items and provide the required documentation, all in real time with our EMS integration.

#### **Seamless Connectivity with our Certified Techs**

Access remote programming services with an asTech technician who will take you through every step of the calibration process to complete any repair from start to finish.

**Using asTech for calibrations has allowed our facility to decrease cycle time by approximately two days while increasing the quality of the repair.**

**Brian Martin**, Director of Auto Collision at Lexus of North Miami Collision Center

Start increasing your customer shop visits with expanded offerings and guaranteed quality repair performance.
